PURPOSE OF THE COMMUNITY PROFILE

This Community Profile is intended to serve as a "one stop" fact booklet for Erwin, North Carolina. It provides, detailed information about the Town's physical, social and economic characteristics as well as selected miscellaneous data. This publication is the first effort of its kind in Erwin to gather, within one cover, such a variety of information. It should aid new residents, new employers, public officials, and interested citizens in learning more about their town.

HISTORY

HISTORY OF ERWIN

With the construction of the Erwin Cotton Mills in 1903, the Town of Erwin began as a residential community of textile workers and their families. The initial plan of the settlement, first called Duke, provided for 300 houses and basic community services. Within a few years, the settlement included churches, a hospital, a post office, a school and several stores.

Being the primary employer in the community, the Erwin Mills Company has shaped the history and development of the town by its policies. The expansion of the mill in the 1920's led to a period of population growth and housing construction. During this same period, the company laid a system of water and sewer lines in the central town area. The 1950's ushered in a company policy that granted the community a much greater degree of freedom. The company began selling the houses and lots to town residents. This policy was continued by the new plant owner, Burlington Industries, so that most properties in the community are today owned by individuals.

Burlington Industries dedicated the water and sewer lines to the Town of Erwin when it was incorporated in 1967. Since that time the new municipality has greatly expanded its facilities and services to make Erwin what it is today.

LOCATION

The Town of Erwin is located in the southeastern portion of Harnett County, North Carolina, on Federal Highway 421. It is situated approximately five miles west of Dunn (population 8,302,) thirty miles from the Raleigh metropolitan area (population 228,453,) and twenty-five miles from the Fayetteville metropolitan area (population 212,042.) Refer to Figure 1.

TOPOGRAPHY

The landform of Erwin is fairly level with slopes rarely exceeding 3 percent grades. This nearly level ground extends beyond the town limits in the eastern and southern directions providing ample area for continued development. Along the western to northwestern border of the town, development possibilities are considerably more limited due to the steep slopes that range to 25 percent grades. Such steep slopes prohibit most industrial, commercial and residential uses.

SOILS

There are few developmental limitations resulting from the soil types in Erwin. Most of the area consists of well-drained sandy loam soils that are suitable for dwelling units, industrial and commercial development, and street construction. An area of land near the southeastern corner of the Old Post Road and State Route 1741, however, is composed of Coxville fine sandy loam soil. This soil type presents severe limitations for all forms of development and construction. Another soil type, Dunbar fine sandy loam found in scattered pockets adjacent to the Erwin School site, is characterized as having moderate limitations for most types of development.

CLIMATE

The climate in Erwin is characterized as being humid and subtropical with long, hot summers and relatively mild winters. Spring and autumn tend to be drawn out and quite pleasant. (Refer to Table 1.)

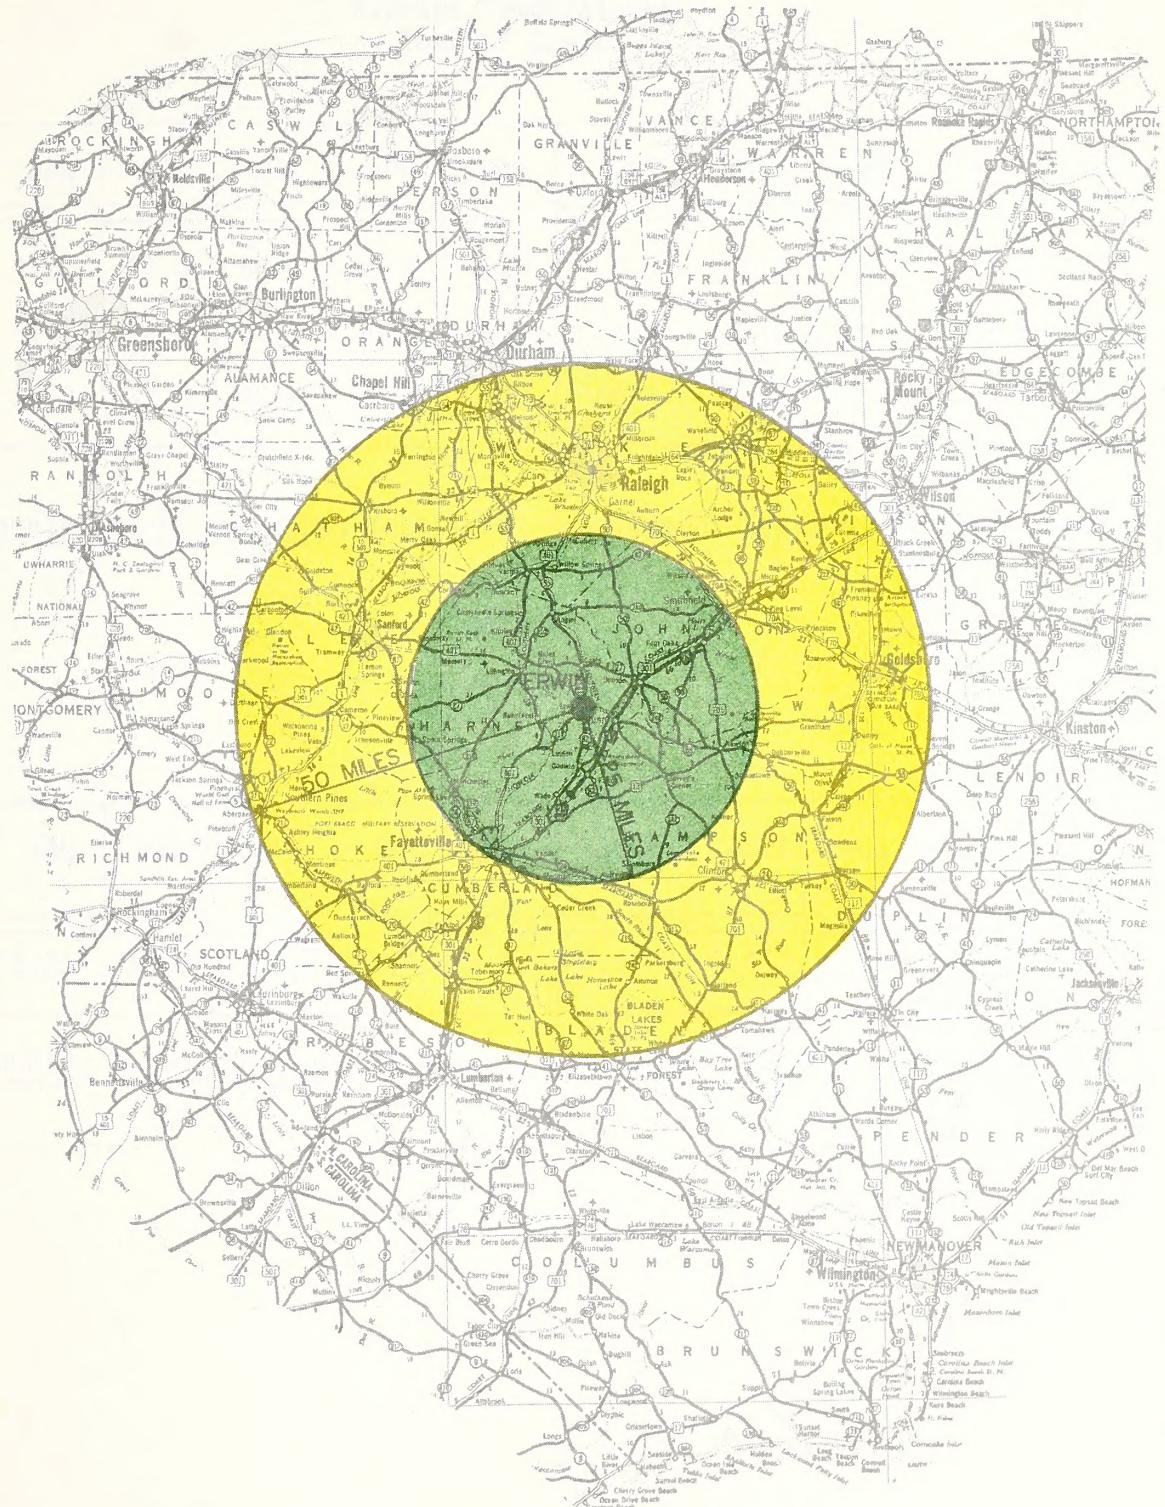

The average 45.34 inches of annual precipitation in Erwin is well distributed throughout the year. July has, on the average, the greatest amount of rainfall with 5.43 inches annually and November the least with 2.55 inches. (Refer to Table 2.) Snowfall is light with less than three inches per year.

MINERAL RESOURCES

The area of Harnett County surrounding Erwin has large deposits of minerals used for construction purposes. These deposits include sand, gravel, clay, shale and lightweight aggregates.

WATERSHED BASIN

Erwin is situated in the Cape Fear River basin and is well-drained by both the Cape Fear River and the Black River.

Bus and United Postal Service

RECREATION

Erwin has two well developed municipal parks providing a variety of recreational facilities. The Erwin Municipal Park, located southeast of town, is on an open thirty six acre site. It contains two tennis courts; an all purpose hard surface court with four basketball goals; a softball field; a lighted combination baseball-football field; a lighted picnic shelter; portable bleachers; a fenced-in play area for small children; a large parking lot for motor vehicles; and a building furnishing rest rooms a concession stand and a meeting room. Long range plans for the municipal park includ

construction of a nine-hole golf course. Erwin's other public recreation area, the Rotary Park, is situated on a centrally located four acre site. The shaded park area is divided by the convergence of two small streams. The facilities at this area include playground equipment; restrooms; a lighted picnic shelter; an all-purpose, hard surface court with four basketball goals; picnic tables; and a paved parking lot for approximately 30 cars. Long range plans include the construction of a gazebo. During the summer vacation months, the town employs a parks-recreation director to supervise the program activities.

HOUSING

Although seventy-two percent of the housing stock in Erwin was built prior to 1939 (as compared with thirty two percent for the state of North Carolina as a whole), the percent of substandard and overcrowded housing is quite low when compared to state levels. The good condition of the housing is attributable to the fact that eighty percent of the houses are owner occupied (as compared with sixty-five percent for the state). It is interesting to note that although the percent of owner-occupied housing in good condition is higher in Erwin than in the state as a whole, the median value of houses is lower than the state average. (Refer to Table 3.)

CULTURAL ASPECTS

Public library is provided.

Concert series at Campbell College (4 miles away) and in Raleigh (30 miles away).

Three newspapers published in the county.

Two radio stations in the county.

Five T.V. stations with good reception.

RELIGION

Six protestant churches, no Catholic or Jewish.

INSTITUTIONS

City Hospital: 55 beds

County Hospital: 117 beds

Two doctors in Erwin, twenty-two in the county

Two banks

SOCIAL CHARACTERISTICS

POPULATION TRENDS AND PROJECTIONS

It is very difficult to make accurate population projections for a town the size of Erwin because of unforeseen circumstances that could have a profound effect on its population size.

A single annexation by the town, for example, could double the population overnight. The provision of a new employer or the elimination of an existing employer could also radically effect the population size.

Although a long range population projection figure could be presented, its accuracy would be in doubt because of the probability of intervening circumstances that are unforeseen at this time.

EDUCATION

Although Erwin has an adequate school system and good access to many colleges and universities in the area, the median number of school years completed by Erwin residents is lower than the figures for Harnett County and the State of North Carolina (Refer to Table 6). Eighty-five percent of Erwin's residents, twenty-five years of age and older have not graduated from high school, as opposed to the state as a whole which has a much higher percentage of high school graduates (39% as compared to only 15% in Erwin). These figures indicate that Erwin is far below the state average in educational achievement.

POVERTY AND PUBLIC ASSISTANCE

Approximately twelve percent of Erwin's population earns less than a poverty level income, (Refer to Table 8). Although this figure is much too high ideally, it represents a lower poverty rate than North Carolina has as a whole. A problem in Erwin needing attention, however, is the fact that 100 families earning below poverty level incomes receive no public aid (Refer to Table 7.) An effort should be made to extend the needed financial assistance to those people.

ECONOMIC CHARACTERISTICS

GOVERNOR'S AWARD PROGRAM

Erwin has been designated a "Governor's Award Community" by the Commerce and Industry Division of the North Carolina Department of Natural and Economic Resources. This means that certain requirements to better prepare Erwin for industrial and economic development have been met by the community. A benefit derived from this award is the assistance of the Commerce and Industry Division in helping the Town achieve its industrial development goals.

EMPLOYMENT

The majority of the people in Erwin's working force are employed by the manufacturing industry and classed in the operatives and kindred occupation group. (Refer to Tables 9 and 10.) This group is largely employed in the Burlington Industries Plant, which estimates a work force of approximately 2,200 employees as of January, 1976.

Although the woven fabrics industry is viable and growing, Erwin should encourage the construction of new industrial plants to diversify the employment base.

FAMILY INCOME

The medium family income for residents of Erwin is eight percent higher than that of Harnett County as a whole (Refer to Table 11). Thirty-one and five tenths percent of the families make below \$5,000.00 annually as compared to thirty-six and eight tenths percent for the County. Erwin is better off on the other end of the income scale as well. Eight and nine tenths percent of the families earn incomes of greater than \$15,000.00 as compared to six and four tenths percent for Harnett County.

Both Erwin and Harnett County fall below the state average weekly wage figures for all categories of employment (Refer to Table 12). Manufacturing is the category with the smallest variance from the state average, due to the comparable level of textile salaries at Erwin's plant.

PROPERTY VALUE

Both Harnett County and the Town of Erwin are experiencing a healthy increase in the taxable value of property (Refer to Table 15). This increase in property values is not only due to continued high inflation, but is due to new construction in the area as well. With the growth of the Raleigh and Fayetteville metropolitan areas it is not surprising that Harnett County would experience new construction. What is surprising is that Erwin's property value growth rate is nearly as great as that for the County. In other words, Erwin is maintaining its position in relation to the County in terms of property values.

Per Capita Bonded Indebtedness	\$20.13	\$143.76

FISCAL YEAR 1971-72

Taxable Value of Property	\$149,548,642	\$14,340,045
Tax Rate	\$1.31	\$1.10
Total Bonded Indebtedness	\$ 1,100,000	\$ 430,000
Per Capita Bonded Indebtedness	\$22.15	\$150.77

FISCAL YEAR 1970-71

Taxable Value of Property	\$143,629,908	\$14,398,140
Tax Rate	\$1.31	\$1.10
Total Bonded Indebtedness	\$ 1,202,000	None
Per Capita Bonded Indebtedness	\$24.20	None

Note: Prior to Fiscal 1974-75 tax levies were based on 65% of assessed value of property. Beginning with Fiscal 1974-75 100% of assessed value of property is used. This procedural change in part explains the increase in taxable values between 1974-75 and 1973-74.
